## Body Fluid Clean-Up services

Blood and other bodily fluids are not only difficult to clean up, they can also be extremely dangerous. Fluids of the body can carry many disease causing agents such as the HIV virus, Hepatitis, Blood-borne Parasites, and Coliform Bacteria to note but a few. The correct cleaning of such fluids minimizes the risk to those persons who may come in contact.

In many cases when squatters or tenants are removed from properties there leave large amounts of waste behind, some of this waste may be hazardous in nature and often contains drug paraphernalia, body fluids, and other dangerous or infectious agents. BJR Contract Cleaning Specialist Hygiene Division is equipped to handle such instances, removing potential hazards such as HIV and Hepatitis from your property.

## Squatters & Eviction Clean-Up

## Accidental Death, Suicide & Mortality Clean-Up

Apart from being extremely traumatic for those involved, death and suicide scenes can contain hazardous fluids, airborne bacteria and produce overwhelming malodors. The safe, correct, and expedient cleaning of such scenes is imperative for environmental safety as well as respect for the deceased and their relations. Our trauma scene operatives have the experience, knowledge and equipment to remove infectious agents and offer a sensitive and discreet approach to the service.

## Needle, Syringe & Sharps Removal

Safe removal of sharps, needles and syringes is imperative to the minimization of the health risks associated with "needle stick" injuries. Our removal services operate on a 24-hour basis.

## Biohazard Kits, Service Collection & Disposal

BJR Biohazard Kits are available for all business models regardless of size. This product is designed to protect staff, customers and visitors by providing you with the equipment and knowledge to handle accidental blood/bodily fluid spillages in the correct manner. These Kits are a key aspect of a good health and safety management system and an integral part of best practice waste management systems.

### Key Attributes

BJR Biohazard Kits are unique in that our price includes collection and incineration of the contaminated kit items following the clean up disinfection process, as well as initial consultation, demonstration and installation. Unlike other biohazard spillages kits on the market our kits are designed to a clinical facility level ensuring a maximum degree of protection for the user.

## Service Fundamentals

Our 24-hour help desk is open to service pack customers. We will guide you through the correct procedure for decontamination over the phone 24-7, should you find yourself unable to handle the situation, or feel you would be best served by having a professional advise you.

Like our other services our biohazard kits are the complete package from installation to collection. BJR Biohazard Kits enable you to handle bodily fluid spillages in a safe, effective, and rapid manner while, adhering to health and safety legalisation, and correct waste management protocols.

BJR Biohazard Kits minimizes the risk to your staff, customers, patrons, visitors and indeed yourself as a responsible employer.
