Biohazard Kits, Service Collection & Disposal

BJR Biohazard Kits are available for all business models regardless of size. This product is designed to protect staff, customers and visitors by providing you with the equipment and knowledge to handle accidental blood/bodily fluid spillages in the correct manner. These Kits are a key aspect of a good health and safety management system and an integral part of best practice waste management systems.

Key Attributes

BJR Biohazard Kits are unique in that our price includes collection and incineration of the contaminated kit items following the clean up disinfection process, as well as initial consultation, demonstration and installation. Unlike other biohazard spillages kits on the market our kits are designed to a clinical facility level ensuring a maximum degree of protection for the user.

Why You Need This System!

The Health and Safety Authority have made a number of suggestions under current guidelines in relation to Biological agents such as Blood. Some frequently asked questions include.

Does the employer have to carry out a Risk Assessment?

Yes. It is the duty of every employer, under Section 19 of the Safety, Health and Welfare at Work Act 2005 to carry out a risk assessment.

What hygiene and individual protection measures should be taken when working with biological agents?

In the case of any activity in relation to which there is a risk to the safety or health of employees caused by working with a biological agent, the employer must take appropriate measures to ensure that:

Employees are provided with suitable personal protective equipment (PPE)

Any necessary PPE is:

- i. properly stored in a designated place
- ii. checked and cleaned if possible, before, and in any case after each use
- iii. repaired, where defective, or replaced, before further use

The working clothes and PPE are decontaminated and cleaned or, destroyed in the correct manner under the waste management act 1996 and amended 2001.

Should employees receive any specific training or information regarding working with biological agents?

Yes. Where there may be a risk to the safety or health of employees due to work with a biological agent, the employer must ensure that employees or their safety representative, or both, receive sufficient and appropriate training and information concerning:

1. Potential risks to health
2. Precautions to be taken to prevent exposure
3. Hygiene requirements
4. The wearing and use of personal protective equipment
5. The steps to be taken by employees in the case of incidents and to prevent incidents

BIOHAZARD KITS

Our Biohazard spillage kits insure the safety of your staff and members of the public. These units are unlike any other spill kits as they are custom to your business and include the collection and disposal of the resulting hazardous waste.
